Greetings

We are pleased to offer “hygienic toilet seat cover products” which comes in 2 different types which we think you might be interested in.

As you know that in crowded workplace restrooms there are serious hygiene issues and toilet hygiene became a necessity. Although many cleaning products as well as paper covers were used to fix this problem but the results are still unsuccessful and the hygiene issue is creating a snowball effect. Moreover, when you take into consideration the waste of time, water, and labor; costs reach a very serious dimension. Besides, even if the area seems to be clean; many of us avoid contact with the toilet seat and find solutions such as placing toilet papers all over or stand without sitting.

1-There is a branded hygienic toilet seat cover product being manufactured in Turkey which is the **TURKEY'S FIRST AND ONLY RECHARGEABLE BATTERY POWERED AUTOMATIC TOILET SEAT COVER SYSTEM**

FEATURES

It's Hygienic

Each time you press the button a new roll will cover your seat so you will be the first to use it.

It's Smart

The inserted chip knows how many times it should turn around the seat by providing a hygienic surface.

It's Economic

To prevent unnecessary usage, once the button is pressed, 20 seconds duration must elapse. If not, even if you press repetitively, the toilet seat won't function.

It's Disposable

The blade located at the entry of the waste section of the toilet seat prevents the reuse of the same roll by destroying the used plastic.

It works with a Rechargeable Battery

The toilet seat functions with a 6V rechargeable battery. After charging the battery for 6 hours, the toilet seat will operate between 2500-3000 usages (approx. 4-6 months depending on the frequency) until it needs to be recharged.

Is available where hygiene, economy and prestige is required:

Compatible with all types of toilet designs

Easy to install and easy to use

Convenient to use with or without the top cover

EASY TO USE

With only a touch, the plastic film will turn around the seat ring and after will be cut by a special blade located at the waste section preventing the reuse of that same plastic film.

Rechargeable battery

6V rechargeable battery, the hygienic toilet seat cover system will provide a long-time operation. By just charging 6 hours the system will operate repeatedly. Does not cause any danger on wet floors.

2nd product is TURKEY'S AND WORLD'S FIRST AND ONLY AUTOMATIC LEDSOR (LED SENSOR) TOILET SEAT COVER SYSTEM

FEATURES

It's Touch Free

By placing your hand inside the Ledsor, the roll will start to rotate on the seat ring. The Led Sensor based on the Ledsor makes this operation completely touch free; your hand won't touch anything.

It's Hygienic

Each time you place your hand inside the Ledsor, a new roll will cover your seat so you will be the first to use it.

It's Smart

The inserted chip knows how many times it should turn around the seat by providing a hygienic surface.

It's Economic

To prevent unnecessary usage, once your hand is inside the Ledsor, 20 seconds duration must elapse. If not, even if you place your hand repetitively, the toilet seat won't function.

It's Disposable

The blade located at the entry of the waste section of the toilet seat prevents the reuse of the same roll by destroying the used plastic.

Works through electricity and adaptor

Works through converting 220V electric current into 12V by it's enhanced adaptor.

Does not cause any danger on wet floors.

Is available where hygiene, economy and prestige is required:

Compatible with all types of toilet designs

Easy to install and easy to use

Convenient to use with or without the top cover
